

## CORONAVIRUS FAST FACTS

(As of March 15, 2020)

### FACTS:

-There are ~3668 cases of Coronavirus-19 in the United States and ~169,516 cases worldwide.

- There **have only been 68 deaths** in the United States and ~6,515 deaths worldwide. 77,753 people have recovered from the virus worldwide.

(Conversely, There are over 13 million cases of the Flu in the United States and **16,000 deaths from the flu** this flu season.)

- There are 149 cases of Coronavirus in Florida. 13 are Non-Florida Residents. There have been 4 deaths.

-There are **no** cases of Coronavirus as of now in Lake County.

-The Coronavirus is highly contagious and since it is new, people have not developed resistance to it and there is no vaccine as of yet for it.

-Both the Flu and Coronavirus are spread by being very close (within 6 feet) of someone with the virus who is coughing or sneezing. The virus **may** be spread from surfaces that the person with the virus has touched but this is not confirmed. The virus **may** be spread by persons with the virus before they develop symptoms.

-The Coronavirus is easily killed with simple soap and water or disinfectant.

**--Most people who get the Coronavirus will have little or no symptoms.**

--The Coronavirus is most dangerous in men over the age of 50, the elderly and those with weakened immune systems.

--This is **NOT** a deadly virus for children. Children (so far) have little or no symptoms and easily recover.

\*You will NOT get Coronavirus from Corona Beer.

\*You will NOT get Coronavirus from eating Chinese food.

\*Asian Americans do NOT have a higher risk of having the Coronavirus than the rest of Americans.

\*Disinfecting your home will only help you IF you or a family member has the virus.

\*Do NOT put disinfectant wipes on your face.

\*Disinfectant gels/wipes do NOT take the place of washing your hands.

\***Face masks are meant to be worn by those who are sick** to prevent them from spreading infection by coughing or sneezing onto others. (Many Americans are not aware that it is routine to wear face masks in China in the winter due to air pollution.)

## **HOW TO PREVENT:**

-Wash or disinfect your hands thoroughly, frequently and **before** touching your face especially your nose, eyes and mouth.

--Cough/Sneeze into your elbow or shirt (NOT into your hand.)

-IF you have flu like symptoms, stay home.

-IF you develop a dry cough and high fever, call your doctor, stay home and drink lots of fluids.

-IF you develop trouble breathing, seek medical attention immediately.

-IF you have travelled outside of the US in the last 2 weeks -OR- if you think you have been exposed to someone with Coronavirus AND you have symptoms of a dry cough and high fever, stay at home and contact your primary care doctor for further instruction.

-IF you are elderly **or** have a weakened immune system, then you should avoid being around large groups of people & people who are ill. Stick close to home and limit your visitors.

--Boost your immune system by getting sleep, getting fresh air, taking your medicines & vitamins and eating healthy.

If you say, "The Lord is my refuge," and you make the Most High your dwelling, no harm will overtake you, no disaster will come near your tent. For he will command his angels concerning you to guard you in all your ways. Psalms 91: 9-11
